

Lighting, Alarm and Temperature Monitor

WHY USE THE IM4 ?

The IM4 monitor combines temperature display and alarm functions with the ability to control cold room lighting, making it an indispensable part of your refrigerated space solutions.

Ensure the safety of your staff and guarantee the freshness of your food with a reliable and easy to use monitor.

RELIABILITY

An all-in-one from a renowned supplier in the control systems industry.

SIMPLICITY

Pre-wired at the plant, it's an easy and quick installation waiting for you on site.

FEATURES THAT PROVIDE SAFETY ABOVE ALL!

- Automatic lighting with time delay on door opening
- Temperature display on a digital interface with LED light
- Display of different types of alarms:
 - o Panic
 - o Loss of power
 - o High and low temperature
 - o Open door
 - o Fan failure
- Panic button:
 - o Backlit: Visible at all time
 - o Installed inside the cold room: Reachable for someone in danger inside the walk-in
 - o Resounding alarm: Remote audible at over 95 decibels
- Can be connected to a conventional alarm system
- Meets CSA B52-13 Standard Section 9.2

- Identify a complication in the room
- Quick response to alarms
- Optimized energy use

IM4 MEETS INDUSTRY STANDARDS AND MUCH MORE!

- Rechargeable back-up battery in case of power failure

Benefits

- ✓ Energy saving;
- ✓ Improved efficiency of daily operations;
- ✓ Reduction of costs associated with maintenance;
- ✓ Near-instantaneous control thanks to quick on-site installation;
- ✓ A robust option due to the compact and watertight housing that can be flush or surface mounted in the cold room;
- ✓ The powerful alarm ensures employee safety and reduces the risk of food loss.

IM4: Continuous monitoring that allows you to keep every one of your resources safe.
