NORBECTM

Insulated metal panel solutions | Walk-in coolers & freezers

Refrigerated Custom Walk-In Solutions for Your Projects !

INSTALLATION

Each installation includes protective packaging, numbered panels, clear assembly plans, suspension assemblies, hardware and sealant required for installation, factory prewired and tested electrical equipment in addition to technical assistance.

As specialists in custom manufacturing, Norbec offers you personalized walk-in coolers and freezers that take into account your needs and constraints while allowing you to get the most out of your work space.

Norbec products provide superior quality and outstanding ruggedness. Various options are available to meet the specific requirements of restaurants, hotels, reception centres, cafeterias, institutions and many more !

Insulated Panels

Constructed of steel and polyurethane foam in thicknesses of 4" or 5", polyurethane microcells eliminate all possibility of moisture build up. Sturdy steel backing plates reinforce locations for installing hardware while steel camlock fasteners ensure perfect panel assembly every time.

Finishes

White Steel, 26 gauge, easy to clean smooth or good scratch resistance striated silkline design.

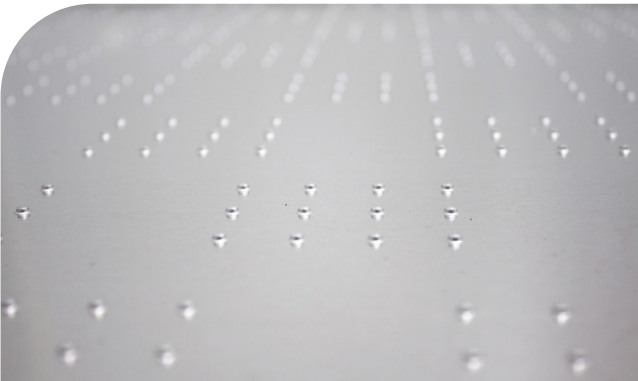

A wide variety of colours and finishes are offered to suit every aesthetic and/or functional need. From standard white, embossed, stainless steel or even black, we help you find the right choice for your walk-in projects !

Insulated Floors

Aluminum 0.100 floors

Options

- NextGrip Anti-Slip floor
- Different floor configurations based on loads to be supported
- NSF construction
- Floor spacers to facilitate air circulation and minimize condensation

Refrigeration

Norbec's refrigeration systems answer your needs for all types of environments.

Systems (Refrigeration Options)

- **INTELLIREF V2 CONTROLLER**
Simplify refrigeration control and guarantee the freshness of your food 24/7 with the **IntellirefV2** robust design, providing a range of medium and low temperature applications with air electric defrost.
- **IM4 LIGHTING, ALARM AND TEMPERATURE MONITOR**
The reliable and easy to use **IM4** monitor is equipped with panic, loss of power, high and low temperature, open door and fan failure alarms for you to experiment a greater peace of mind and to ensure the safety of your staff.

Performance. Durability. Efficiency.

Doors

Our turnkey solution includes a variety of durable doors designed for all foodservice applications.

Door types

- Hinged doors : durable, sturdy and highly resistant structure that will withstand the test of time
- Service doors : (solid or glass) for quick access to small quantities of food or to use with a conveyor
- Sliding doors : easy to open and close with minimum effort, recommended where space is limited
- Swinging doors : easiest operation for staff and for better customer experience
- Doors for blast freezers : constructed to withstand use at very low temperatures, two point locking system for airtightness

Options

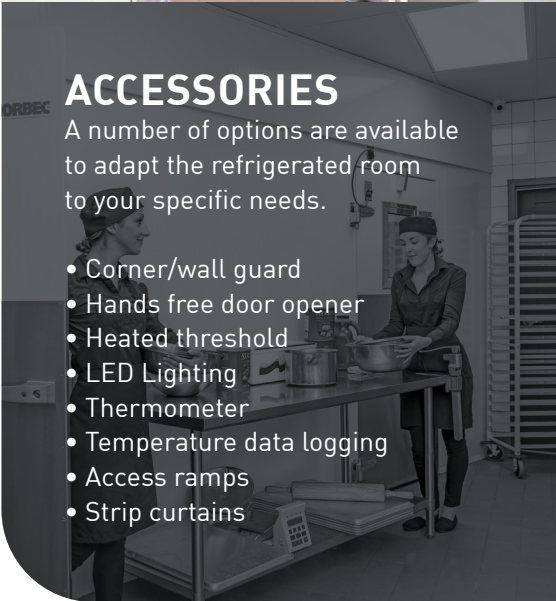

- Windows
- Protection plate kick-plates
- Corner guards
- Double doors
- Meat-rail opening
- Self-closing (for sliding doors)
- Glass doors
- Built-in heating threshold

ACCESSORIES

A number of options are available to adapt the refrigerated room to your specific needs.

- Corner/wall guard
- Hands free door opener
- Heated threshold
- LED Lighting
- Thermometer
- Temperature data logging
- Access ramps
- Strip curtains

DOOR FRAMES

Each door is individually designed and manufactured in-house using unique assembly methods. The Norbec door line offers a one-of-a-kind flexibility unmatched on the market.

From the designing to manufacturing stages, quality is of the utmost importance in the development of our products making them the most durable and safest for your project.
