

NORSEAM®

INSULATED STANDING SEAM ROOF SYSTEM

The background of the advertisement is a high-resolution photograph of a large, industrial standing seam metal roof. The roof panels are light-colored and run diagonally across the frame, creating a strong sense of perspective and depth. The sky is not visible, as the roof dominates the upper half of the image.

WE STAND UP.

ROOF SYSTEMS THAT STAND UP
TO REAL-WORLD DEMANDS.

ENGINEERED FOR SIMPLER ROOFING.

Traditional roofing assemblies require multiple layers, trades, and points of coordination.

What if you had a system with fewer interfaces, installation variables and opportunities for failure? Would you consider it?

NorSeam® simplifies the process with a fully integrated insulated standing seam roof system engineered for installation readiness, including factory-notched ends and factory-fabricated end lap joints designed to reduce field cutting and on-site fabrication.

The result is a more consistent, repeatable installation process with fewer field variables and greater long-term performance confidence.

WHAT NORSEAM® STANDS UP TO.

LESS COORDINATION RISK

One integrated roof assembly reduces layers and trade overlap.

PREDICTABLE WATER CONTROL

Mechanically seamed standing seam design engineered for long-term performance.

THERMAL PERFORMANCE THAT HOLDS

Continuous PIR insulation minimizes thermal bridging vs. built-up assemblies.

FASTER INSTALLATION

Large-format panels enable rapid dry-in and reduce labor dependency.

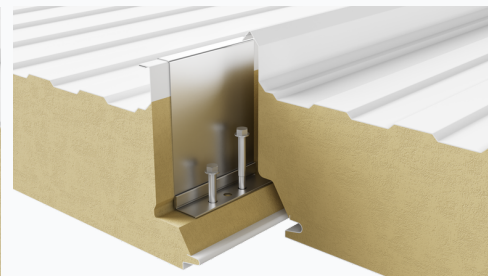

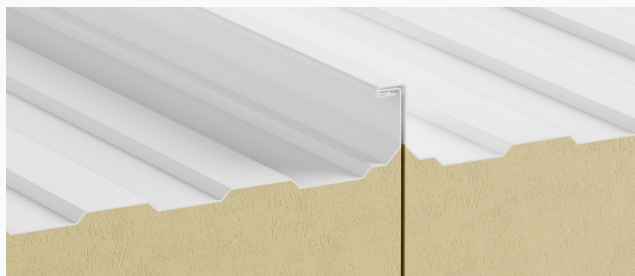

FEWER FAILURE POINTS

Simplified assemblies reduce long-term maintenance exposure.

DESIGNED TO MAKE YOUR VISION STAND.

NorSeam® combines clean architectural lines with integrated building performance to support ambitious industrial, commercial, and institutional projects.

CLEAN LINES

→ Modern standing seam appearance.

LONG SPANS

→ Greater flexibility and usable space.

DESIGN CONTINUITY

→ Roof and wall systems developed to work together.

DETAILING SUPPORT

→ Technical collaboration from concept to construction.

Norbec building envelope systems integrate roof and wall IMPs into one complete solution.

FROM DRAWING TO STANDING. NOTHING IS MISSING.

Norbec supports projects beyond product supply. From technical detailing and manufacturing to delivery coordination and installation guidance, NorSeam® is backed by teams focused on helping projects move forward with confidence.
